

Regional Dissemination Workshop

Design and impact of a harmonised policy for renewable electricity in Europe

Final results of the detailed RES policy assessment within the beyond2020 project

Location: Grand Hotel Bohemia (Room Boccaccio), Kralodvorska 4, Prague, Czech Republic

Date: Wednesday, 2 October 2013 (10:30-17:30 CET)

The beyond2020 project

With Directive 2009/28/EC, the European Parliament and Council have laid the grounds for the policy framework for renewable energy sources (RES) until 2020. Aim of this proposed action is to look more closely beyond 2020 by designing and evaluating feasible pathways of a harmonized European policy framework for supporting an enhanced exploitation of renewable electricity in particular, and RES in general. Strategic objectives are to contribute to forming of a European vision of a joint future RES policy framework in the mid- to long-term and to provide guidance on improving policy design.

The final outcome is a finely-tailored policy package, offering a concise representation of key outcomes, a detailed comparison of the pros and cons of each policy pathway, and roadmaps for practical implementation. The project is embedded in an intense and interactive dissemination framework consisting of regional and topical workshops, stakeholder consultation and a final conference.

The Regional Dissemination Workshop

The core objective of these regional workshops is to undertake a critical reflection on the draft final results and recommendations of the beyond2020 project. The critical feedback will be incorporated into the final work within this project, aiming to deliver a set of finely-tailored and practical policy recommendations on the way forward for RES. At the Prague event, a broad set of stakeholders (EU and national RES policy-makers, decision-makers from the private sector, academics, and (RES) industry) from Central and Eastern Europe will have the opportunity to discuss the RES policy agenda for tomorrow – from both a national / regional and a European perspective. Thus, in addition to attendees from the Czech Republic, key stakeholders from neighbouring countries are also invited to attend this regional workshop in order to ensure the regional dissemination character of the event.

This event is well timed (October 2013) to offer the interested audience a forum for a reflection on the European Commission's RES strategy up to 2030 and other recent topics of interest on the European (RES) energy policy agenda. Furthermore, we would be interested in participants' views concerning the possible harmonisation of RES policy across the EU in the medium to long term (i.e. beyond 2020).
